3. Contact Info Viewed ✓

The screenshot shows a split-screen view. On the left is a mobile browser simulation displaying a 'privy' contact info form. The form includes fields for 'Full name', 'Phone number', and 'Email'. A red 'Continue' button is at the bottom. On the right is the 'Tag Details' panel for a tag named 'GA4 Page View - Contact Info Viewed'. The tag is set to fire when the 'contact_info_viewed' trigger fires. The properties table shows:

Name	Value
Type	Google Analytics: GA4 Event
Firing Status	Succeeded
Send Ecommerce data	false
Event Name	"contact_info_viewed"
Measurement ID	"G-D0G17N664V"

The 'Firing Triggers' section shows the 'contact_info_viewed' trigger selected. It has two filters: '_event equals gtm.js' and 'Page Path contains /registration/form'.

Note :

- Event_Name = contact_info_viewed
- Perlu adanya URL yang beda, path, atau # dengan tujuan pembeda tiap page

4. Contact Info Submitted ✓

The screenshot shows a split-screen view. On the left is a mobile browser simulation showing a 'privy' data confirmation dialog. The dialog says 'Data confirmation' and 'Make sure your contact info is correct.' with 'Check again' and 'Confirm' buttons. Below it is the original contact info form with phone number '+62 0852479104896' and email 'tarjonosukses@gmail.com'. A red 'Continue' button is at the bottom. On the right is the 'Tag Details' panel for a tag named 'GA4 Event - Contact Info Submitted'. The tag is set to fire when the 'contact_info_submitted' trigger fires. The properties table shows:

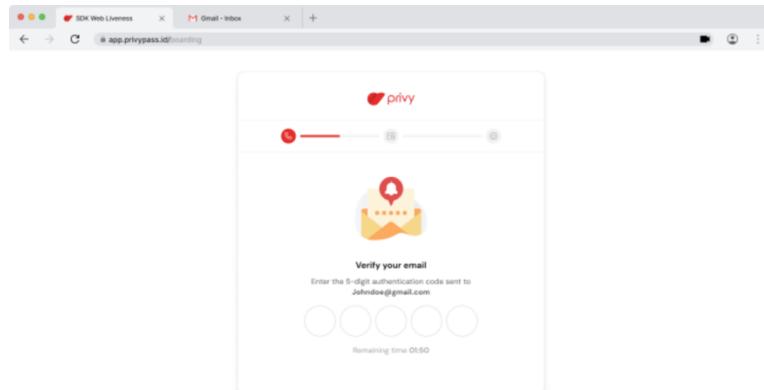

Name	Value
Type	Google Analytics: Peristiwa GA4
Firing Status	Succeeded
Kirim data E-commerce	false
Nama Peristiwa	"contact_info_submitted"
ID Pengukuran	"G-D0G17N664V"

The 'Firing Triggers' section shows the 'contact_info_submitted' trigger selected. It has three filters: '_event equals gtm.click', 'Click Classes equals text-16 p-2', and 'Click Text equals Confirm'.

Note :

- Event_Name = contact_info_submitted
- Done Implement

5. OTP Email Viewed ✗

Note :

- Event_Name = otp_email_viewed
- Perlu adanya URL yang beda, path, atau # dengan tujuan pembeda tiap page

6. Resend OTP Email ✓

Name	Value
Type	Google Analytics: GA4 Event
Firing Status	Succeeded
Send Ecommerce data	false
Include user-provided data from your website	false
Event Name	"resend_otp_email"
Measurement ID	"G-D0G17N664V"

Note :

- Event_Name = resend_otp_email
- Done Implement

18. Personal Info Viewed ✗

Note :

- Event_Name = personal_data_viewed
- Perlu adanya URL yang beda, path, atau # dengan tujuan pembeda tiap page

19. Personal Data Confirmed ✓

The screenshot shows the Google Tag Manager interface. On the left, there's a preview window displaying a form titled 'privy' where personal data like name, ID card number, and date of birth are being entered. On the right, the 'Tag Details' panel shows the tag configuration for the 'GA4 Event - Personal Data Confirmed' tag, which has fired successfully. The properties listed include:

Name	Value
Type	Google Analytics: Peristiwa GA4
Firing Status	Succeeded
Kirim data E-commerce	false
Nama Peristiwa	"personal_data_confirmed"
ID Pengukuran	"G-D0G17N664V"

The 'Firing Triggers' section shows a single trigger named 'personal_data_confirmed' with a filter for '_event equals gtm.click' and a condition for 'Click Element' matching the CSS selector '[data-id="tag-reg005"], [data-id="tag-reg005"]'. The 'Blocking Triggers' section indicates no blocking triggers.

Note :

- Event_Name = personal_data_confirmed
- Done Implement

20. Onboard Liveness Viewed ✗

The screenshot shows a web browser window with the URL 'app.privypass.id/onboarding'. The page displays a 'privy' logo and a 'Liveness detection' section. It includes instructions to turn on the camera, take off glasses or hats, take a photo in good lighting, and ensure no other people's faces are detected. A red 'Continue' button is at the bottom.

Note :

- Event_Name = onboard_liveness_viewed
- Perlu adanya URL yang beda, path, atau # dengan tujuan pembeda tiap page

21. Liveness Continued ✓

The screenshot shows the privy Liveness detection interface on the left and the GTM Tag Details for the 'liveness_continued' event on the right.

Liveness detection interface: A camera feed showing a person's face with a white dashed border around the head. Below the video are three instructions: "Please take off your glasses, hat, or mask.", "Take photo in a place with good lighting.", and "No image or photo of other people's face should be detected in your camera.". A red "Take picture" button is at the bottom.
